Figure 1: Example of what your submission screenshot should look like.

1 Lab Instructions:

Go to the following website and complete all of the lessons:

<div align="center">

https://regexone.com/

</div>

Once you are done with all the lessons you should do the following to prove that you have completed all the tutorials:

1. Keep your completion confirmation screen open.

2. Open a terminal.

3. Run the 'hostname', 'whoami', and 'date' command.

4. Place this terminal and your RegexOne 'completion' page side by side where both can be clearly seen like below:

5. Use the 'PrintScreen' button to launch the screenshot tool. Use the instruction at the following link to take a screenshot of both the terminal and completion webpage open:

https://help.ubuntu.com/stable/ubuntu-help/screen-shot-record.html

6. Find your image in the filesystem. Take a look at the 'Where do they go?' section of the above URL to help you find the images.

7. Check the image is similar to Figure 1 at the top of the instructions.

8. Upload the resulting screenshot image file to Dropbox.

9. After submitting your Lab 04 assignment, refresh the webpage.

10. Download your Lab 04 submission image and view it to confirm that it is as expected.
